SUMMARY

Seeking an internship to leverage and expand my skills in software development, coding, and problem-solving. Currently pursuing BE in IT, aspiring to be a full-stack developer, with a strong foundation in core concepts and hands-on experience in Spring Boot (Java), React (JavaScript). Eager to contribute to innovative projects and gain practical experience in a dynamic and collaborative environment.

St. Ann's School, Beed, Maharashtra
70%

PROJECTS

Athletrix (Infosys Springboard)

- This platform connects sports administrators, coaches, and athletes, enabling event management, performance tracking, and personalized training solutions.
- The project was developed using technologies like Spring Boot, React, and MongoDB.
- It also features JWT authentication for secure user management.

ISKCON Task Allocation System (Coding Savvy)

- A task management platform for ISKCON IT Cell, enabling admins to assign tasks and volunteers to respond.
- Built with React, HTML, CSS, Bootstrap, JavaScript, using Figma for design and GitHub for collaboration.

EduTrack

- A platform for streamlined workflows, role-based access, and tracking.
- Built with Spring Boot, React, Tailwind CSS.

TECHNICAL SKILLS

- **Areas of Interest:** Data Structures, Algorithms, Problem Solving
- **Programming Languages:** Java, C/C++, JavaScript
- **Libraries/Frameworks:** Springboot, Node, React, Next, Git
- **Database:** MySQL, MongoDB, Firebase
- **Platforms:** Vercel, Notion
- **Languages:** English, Hindi, Marathi
